### READ OPERATOR MANUAL CAREFULLY!

**IMPORTANT:** To ensure full warranty protection, please fill out & return your warranty card.

Please fill out at time of installation for future reference.

Model No. \_\_\_\_\_

Serial No. \_\_\_\_\_

Machine Options \_\_\_\_\_

Sales Rep. \_\_\_\_\_

Sales Rep. Phone No. \_\_\_\_\_

Customer ID Number \_\_\_\_\_

Installation Date \_\_\_\_\_

### HOW TO ORDER PARTS

Only use ICE Company supplied or equivalent parts. Parts and supplies may be ordered online, by phone, by fax or by mail.

1. Identify the machine model.
2. Identify the machine serial number from the data label.
3. Ensure the proper serial number is used from the parts list.
4. Identify the part number and quantity.  
Do not order by page or reference numbers.
5. Provide your name, company name, customer ID number, billing and shipping address, phone number and purchase order number.

#### PROTECT THE ENVIRONMENT

Please dispose of packaging materials, old machine components such as batteries, hazardous fluids, including antifreeze and oil, in an environmentally safe way according to local waste disposal regulations.

Always remember to recycle.

### ICE Company Limited

XiangShi Road LiaoBu DongGuan GuangDong China

Tel: 0769 - 81869000

Fax: 0769 - 81863000

Specifications and parts are subject to change without notice.

## SAFETY PRECAUTIONS

This machine is intended for commercial use. It is designed exclusively to scrub hard floors in an indoor environment and is not constructed for any other use. Only use recommended accessories.

**All operators shall read, understand and exercise the following safety precautions:**

### 1. Do not operate machine:

- Unless trained and authorized.
- Unless you have read and understand the operators manual.
- In flammable or explosive areas.
- With brake disabled.
- If not in proper operating condition.

### 2. Before starting machine:

- Make sure all safety devices are in place and operate properly.
- Check brakes and steering for proper operation.

### 3. When using machine:

- Go slow on inclines and slippery surfaces.
- Follow all safety guidelines.
- Be very careful when using the machine in reverse.
- Reduce speed when turning.
- Report and fix any damage to machine prior to operating it.
- Never allow children to play on or around.

### 4. Before leaving or servicing machine:

- Stop on level surface.
- Turn off machine.

### 5. When servicing machine:

- Read operators manual thoroughly prior to operating or servicing this machine.
- Use manufacturer supplied or approved replacement parts.
- Secure machine with wheel blocks prior to jacking the machine up.
- Use approved jack or hoist to safely elevate the machine.
- Disconnect batteries prior to working on machine.
- Avoid moving parts. Do not wear loose fitting clothing while servicing machine.

**WARNING:** Explosion or fire can result from hydrogen gas. Keep sparks and open flames away! Keep battery compartment open when charging.

**WARNING:** Flammable materials can cause an explosion or fire. Do not use flammable materials in tanks.

**WARNING:** Flammable materials or reactive metals can cause explosion or fire. Do not pick up.

## MACHINE COMPONENTS

1. Solution tank
2. Auto-fill hose port (Option)
3. Hose fill port & Cap
4. Squeegee assembly
5. Wheels, 10 inch
6. Scrub head assembly
7. Side squeegee assembly
8. Cup holder
9. Brake pedal
10. Propel pedal
11. Front drive wheel

12. Operator seat
13. Steering wheel
14. Control panel, Touch screen
15. i-synergy™, ID card scanning area
16. LED light, work
17. Emergency Stop button
18. Adjusting handle, seat
19. Off-board battery charger port (Option)
20. Watching window, On board battery charger
21. Warning light
22. Recovery tank cover
23. Recovery tank
24. USB Charging port
25. Cabin door, Detergent bottle compartment
26. Mesh, Battery charger power cord.

## MACHINE COMPONENTS

- 27. Horn button
- 28. Battery meter
- 29. Date & Time
- 30. Solution flow adjusting button
- 31. 1-Step starting button
- 32. Work mode select button
- 33. Detergent adjusting button
- 34. Timer
- 35. Brush pressure adjusting button
- 36. Direction button
- 37. Setting button
- 38. Vacuum motor button
- 39. Fault icon
- 40. Warning light button
- 41. Drain hose, recovery tank
- 42. Vacuum hose
- 43. Drain hose, solution tank
- 44. Adjusting knob, Squeegee

## i-synergy™ INTRODUCTION

i-synergy™ collects operational data from cleaning machines and transmit the information to ICE's server. The ICE server generates daily reports and send them to designated end users by email. From these reports, end users will have information about machines' usage and even specific timings.

Besides, i-synergy™ also collects data on lithium-ion battery, vacuum motor, brush deck motor, transaxle, and other electrical components at least once every minute when the machine is in use and even during battery charging.

i-synergy™ will send notifications instantly to the ICE server in case of any malfunction. ICE maintenance personnel will receive a SMS within minutes from the ICE server for immediate servicing.

## MACHINE SET UP & INSTALLATION

### UNCRATING MACHINE

Be sure and check packing carton for any damage. Immediately report any damage to carrier. Check the contents of package to ensure that the following items are included:

- Machine
  - Lithium-ion Batteries
  - Squeegee assembly
  - 2-Pad drivers
  - 2-Brushes
1. Uncrate the wooden box, place the top board on the edge of pallet, lie in the front of the machine, as below shown.

**! WARNING: Do not operate machine unless you have read & understood this manual.**

2. Install batteries.(see *INSTALLING BATTERIES*)
3. Place the ID card on the scanning area (Machine components, #15) to turn on the machine, make sure the Squeegee assembly (Machine components, #4) and the Scrub head assembly (Machine components, #6) is off the floor.

4. Sit in the Operator seat (Machine components, #12), hold the Steering wheel (Machine components, #13), press the Propel pedal (Machine components, #10) and driving slowly the machine down from the slope.

### INSTALLING BATTERIES

The machine uses the Lithium-ion batteries, the batteries are already in the machine upon delivery; However you will need to connect the Lithium ion batteries to the machine.

**WARNING: Fire or Explosion Hazard. Keep sparks and open flames away! Keep battery compartment open when charging.**

1. Turn off the machine.
2. Open and prop up the Operator seat, plug the batteries connector to the machine adaptor, connect machine i-synergy™ COM port to the batteries.

### MACHINE SET UP

#### INSTALLING BRUSHES OR PADS

1. Turn off the 1-Step starting button (Machine components, #31) and raise the Scrub head assembly off the floor, then stop machine on the level surface, ensure the machine is turned off.
2. If using the pad driver, first attach the appropriate pad to the pad driver surface.
3. Align the pad driver or brush under the motor hub and push it upward to engage.

4. To remove the pad driver or brush, raise the scrub head and remove the Side squeegee assembly (Machine components, #7), push the edge of brush downward.

## MOUNTING THE SQUEEGEE ASSEMBLY

1. Turn off the 1-Step switch and raise the Squeegee assembly off the floor.
2. Mount the squeegee assembly to the squeegee pivot bracket. make sure the knobs are completely seated into the slots before securing knobs.
3. Connect the Vacuum hose (Machine components, #42) to the squeegee assembly. Loop the hose by using the hose clip provided.
4. Check the squeegee blades for proper adjustment by adjusting the Squeegee adjusting knob (Machine components, #44).

## FILLING THE SOLUTION TANK

The machine is equipped with a Hose fill port (Machine components, #3) at the side of the machine, and a bucket fill-port located under the recovery tank.

**NOTE: Before accessing the bucket fill-port make sure that the recovery tank is empty. When filling the solution tank with a bucket, make sure that the bucket is clean. Do not use the same bucket for filling and draining the machine.**

## AUTO-FILL HOSE PORT(OPTION)

The machine have a optional Auto-fill hose port (Machine components, #2), you can fill the Solution tank by using filling hose equipped with Quick connectors.

1. Connect the Quick connector of the filling hose to the Auto-fill port and connect the another end to the water supply connector.
2. Turn the water supply on, the water flow will automatically shut off when solution tank is full, and then turn the water supply off.
3. Disconnect the Quick connector from the water supply end first, and then disconnect the Filling hose from machine and store in proper location.

**WARNING: Do not put any flammable materials into solution tank. this can cause an explosion or a fire.**

## FILLING THE DETERGENT BOTTLE

The machine is equipped with a 4 liters Detergent bottle under the Recovery tank. You can fill the Detergent bottle by opening the Detergent bottle cabin door (Machine components, #25), and removing the detergent bottle cap.

The ratio of water and detergent is 0~5%, you can adjust this ratio via pressing the Detergent adjusting button (Machine components, #33).

**NOTE: Only use recommended cleaning chemicals. Contact your janitorial supply distributor for recommendations on proper chemicals.**

## MACHINE OPERATION

**WARNING: Do not operate machine unless you have read and understand this manual.**

## PRE-OPERATION CHECKS

1. Check the tank cover seals for damage.
2. Drain the recovery tank, check the vacuum fan inlet filter, clean them if necessary.
3. Check the vacuum hose for debris or blockage.
4. Check the squeegees for damage, wear and for deflection adjustment.
5. Check whether Pad/Brush is installed properly .
6. Check the brakes and steering for proper operation.

## OPERATION THE MACHINE

1. Sit on the Operator seat, adjusting the seat to comfortable place by pushing the Seat adjustment handle (Machine components, #18).

**NOTE: The machine will not travel unless the operator is sitting in the operator seat.**

2. Turn on the machine.  
Check the Touch screen (machine components, #14) , if the machine have fault there will have a Fault icon display and blinking (Machine components, #39), please Do Not operation the machine unless the faults have been eliminated (please see **FAULT CODES AND ELIMINATE** section).
3. Select the proper working mode by pressing the Work mode select button (Machine components, #32). The machine have 3 Modes of ECO, HEAVY Duty and User custom.

**NOTE: To energy saving, recommend to using the ECO mode as possible.**

For the User custom mode, you can select the preferred settings by pressing the Solution flow adjusting button (Machine components, #30), Detergent adjusting button (Machine components, #33), and the Brush pressure

## WHILE OPERATING MACHINE

- adjusting button (Machine components, #35).
- Turn on the 1-Step starting button, the Scrub head assembly and the Squeegee assembly will lower down automatically, all the presetting functions will turn on.
  - The machine can scrub in both forward and backward, press the Directional button (Machine components, #36) to select the direction. The horn will sound and the squeegee will raise automatically (the vacuum motor will turn off after a short delay) when drive machine backwards. This is to prevent damaging the squeegee.
- NOTE: Go slow when drive machine backwards.**
- Press the Propel pedal, the machine start scrubbing, the speed can be adjusted by controlling the force of foot stepping, light is slow, heavy is fast.
- NOTE: Go slow on inclines and slippery surfaces.**
- To stop scrubbing, turn off the 1-Step starting button, the scrub head will raise automatically, the squeegee will also raise after a short delay, please keep moving until the dirty water is picked up, and then release the propel pedal and stop scrubbing.
  - Turn off the machine.

### **BRAKE DEVICE**

The machine is driven by the Front drive wheel (Machine components, #11), that is equipped with a brake device. When you release the Propel pedal, the machine will stop travel, the park brake will engage after a short delay.

The machine is equipped with a Brake pedal (Machine components, #9), that can be used to control the machine if quicker stopping is needed or if operating on an incline.

### **EMERGENCY STOP BUTTON**

The machine is equipped with an Emergency stop button (Machine components, #17), please push it if any emergency, that will shut off all power of machine and brake immediately.

To restart the machine, please reset the Emergency stop button, and turn off the machine and then restart.

**NOTE: Please hold the steering wheel when emergency stop.**

**WARNING: Fire Or Explosion Hazard. Do Not Pick Up Flammable Materials Or Reactive Metals.**

- Go slow on inclines and slippery surfaces, go slow when turn and reverse. Do not operate the machine on inclines that exceed 7% (4°).
- Drive machine in a straight path as possible, avoid turning the Steering wheel too sharply when machine is in motion. avoid sudden turns except emergencies.
- Do not keep the machine in the same position with pad / brush spinning, keep the machine moving to prevent damage to floor finish.
- If the squeegee assembly leaves streaks on the floor, raise the squeegee off the floor and wipe the blades down with a damp cloth. Pre-sweep the area to prevent leaving streaks on the floor.
- To obtain the optimum cleaning performance, you can adjust the brush pressure, solution flow and detergent dosage as your required. If poor picking up water performance is observed, please stop scrubbing and check the squeegee blade, adjust or replace if necessary.
- If the dirty water path exceed the width of squeegee, please adjust the side squeegee assembly.
- Pour a recommended defoamer into the recovery tank if excessive foam appears.

**WARNING: The foam do not activate water level switch, excessive foam may result in vacuum motor damage.**

- Press the Horn button (Machine components, #27) to alert if necessary.
- The machine is equipped with a Warning light (Machine components, #21), you can select turn ON or OFF by the Warning light button (Machine components, #40).
- If there have Fault icon display and blinking on the touch screen, please stop using the machine and to eliminate the fault (Please see FAULT CODES AND ELIMINATE section).
- For heavily soiled areas, please use HEAVY DUTY SCRUBBING mode by work mode select button.
- If you only want to pick up water needn't scrubbing, Turn on the Vacuum motor button (Machine components, #38), the squeegee will lower down, and turn off the 1-Step starting button (if it is ON), the scrub head will raise and then start to picking water up.

## TANK DRAINING

### DRAINING THE RECOVERY TANK

Any time scrubbing is completed, or when refilling solution tank, the recovery tank should be drained and cleaned.

 **WARNING:** If the recovery tank is not drained when the solution tank has been refilled, foam or water may enter the float shut-off screen and cause damage to the vacuum motor.

1. While holding the Recovery tank drain hose (Machine components, #41) upward, remove the cap and lower hose to drain.
2. Open the Recovery tank cover (Machine components, #22) and rinse out the tank. Use a rag to remove any excess dirt.
3. Remove and clean the vacuum fan inlet filter located in the recovery tank. Clean the filter with a damp cloth or low pressure water hose if dirty. Allow the vacuum fan filter to dry completely before reinstalling it in the machine.

### DRAINING THE SOLUTION TANK

Any time scrubbing operation is completed, the solution tank should be drained and cleaned.

1. While holding the Solution tank drain hose (Machine components, #43) upward, remove the cap and lower hose to drain.
2. Rinse the solution tank with clean water after every use. This will help prevent chemical buildup and clogging of the solution lines.

## BATTERY CHARGING

**WARNING:** Fire or Explosion Hazard. Keep Sparks and Open Flame Away. Keep Battery Compartment Propped Open When Charging.

Use only ICE supplied or approved batteries charger, use unapproved charger may cause damage to the batteries and machine.

*Batteries charger specifications:*

- Applicable to charging Lithium-ion batteries
- Automatic shut off circuit
- Output current of 30 Amps
- Output voltage of 24 volts

1. Transport the machine to a well ventilated area.
2. Turn the machine off.
3. Prop up the Operator seat by the support stand for ventilation.
4. Connect the charger's AC power supply cord to a properly grounded receptable.
5. The charger will automatically begin to charge, you can watching the charging status on the window (Machine components, #20), once the charging cycle begins, the indicator lights will progress from red, yellow to green. when the green indicator light comes on, the charging cycle is done. Unplug the charger cord.

**NOTE:** The machine will can not operate when charging.

## PREVENTATIVE MAINTENANCE

**WARNING:** Before performing any maintenance on the machine, be sure that the power is turned off, or the batteries are disconnected!

**WARNING:** Repairs are to be completed by Authorized service centers only. Any repairs completed by unauthorized persons will void the warranty.

### DAILY MAINTENANCE

1. Remove pad driver/ brush and clean with approved cleaner.
2. Drain recovery and solution tanks completely and rinse out with clean water. Visually check the recovery tank for debris and clean out as necessary.
3. Raise the squeegee assembly off floor and wipe it down with a damp towel. Be sure to store the squeegee in the up position.
4. Remove the vacuum fan inlet filter and rinse it out with clean water.
5. Clean machine with an approved cleaner and a damp towel.
6. Recharge the batteries.
7. Check the condition of the squeegee blade wiping edge, rotate blade if worn.

### MONTHLY MAINTENANCE

1. Clean the battery tops to prevent corrosion.
2. Check for loose battery cable connections.
3. Inspect and clean the recovery tank cover seal. Replace it if damaged.
4. Lubricate all grease points and pivot points with silicon spray and approved grease.
5. Check the machine for loose nuts and bolts.
6. Check the machine for leaks.

### MACHINE STORAGE

1. Always store the machine indoors.
2. Always store the machine in a dry area.
3. Always store the machine in its upright position.
4. Always store the machine with the pad driver/ brush raised off the floor.
5. Always store the machine with the squeegee assembly raised off the floor.
6. If storing in an area which may reach freezing temperatures, be sure to drain all fluids from the machine prior to storage. Any damage caused by freezing temperatures will not be covered by the warranty.
7. Drain the recovery tank.
8. Drain the solution tank of all fluid.

## FAULT CODE & SOLUTION

The machine equipped with a 7-inch touch screen (Machine components, # 14), the touch screen will display Battery meter (Machine components, #28), Date and Time (Machine components, #29), and Working accumulated hours (Machine components, #34).

When the machine detects a fault, there will have a Fault icon blinking (Machine components, #39) on the touch screen accompany an audible alarm Occasionally.

The Fault icon have 2 colors. Yellow icon represents a low level fault, you can click it to pop up a fault message window, it will guide you how to eliminate the fault.

Red icon represents a serious fault, the fault message window will pop up automatically, you can not close it unless the fault be eliminated.

Once the fault icon occurring, please DO NOT continue operate machine unless the faults are eliminated.

Turn off the machine, then to solve the fault, the fault icon will be eliminated when machine restart.

If the fault icon is occurred frequently, or can't be eliminated, please contact ICE service center.

Please refer to the below table to determine the fault cause and the solution.

**FAULT CODE & SOLUTION**

FAULT CODE	FAULT MESSAGE	SOLUTION
F01	Seat Empty	Sit in seat
F02	Squeegee or Scrub head Actuator Overload	Check Squeegee or Scrub head Actuator
F04	Vacuum Motor Overload	Check Vacuum Motor
F05	Brush Motor (Left) Overload	Check Brush Motor (Left)
F06	Brush Motor (Right) Overload	Check Brush Motor (Right)
F07	Drive Motor Overload	Check Drive Motor
F08	Recovery Tank Full	Drain Recovery tank
F09	Solution Tank Empty	Refill Solution tank
F10	Battery Low	Charge battery
F11	Battery Discharged	Charge battery Immediately
F12	Brake Open Circuit	Check brake wiring
F13	Release Accelerate Pedal	Release the propel pedal
F14	Brake Short Circuit	Check brake wiring
F16	Main Controller Overheat	Turn off the machine and re-start after a while
F18	Accelerator Sensor Open Circuit	Check accelerator sensor
F19	Brake Sensor Open Circuit	Check Brake sensor
F20	Brush Motor (Left) Open Circuit	Check Brush Motor (Left) Wiring and Connector
F21	Vacuum motor Open Circuit	Check Vacuum motor Wiring and Connector
F22	Solenoid Valve Short Circuit	Check Solenoid valve Wiring and Connector
F23	Solenoid Valve Open Circuit	Check Solenoid valve Wiring and Connector
F24	Drive Motor Open Circuit	Check Drive motor wiring and Connector
F25	Brush Motor (Right) Open Circuit	Check Brush Motor (Right) Wiring and Connector
F40	Wheel Paluse Sensor Fault	Check Proximity switch
F43	Emergency Stop	Release Emergency stop button
F49	Main Controller Fault	Replace Main controller
F50	Main Controller Fault	Replace Main controller
F53	Detergent Pump Short Circuit	Check Detergent pump Wiring and Connector
F54	Detergent Pump Open Circuit	Check Detergent pump Wiring and Connector
F55	Scrub Head Actuator Open Circuit	Check Scrub head actuator Wiring and Connector
F56	Squeegee Actuator Open Circuit	Check Squeegee actuator Wiring and Connector
F57	Flashing Light Short Circuit	Check Flashing light Wiring and Connector
F58	Flashing Light Open Circuit	Check Flashing light Wiring and Connector
F61	Main Relay (#1) Short Circuit	Check Main Relay (#1) Wiring and Connector
F62	Main Relay (#1) Open Circuit	Check Main Relay (#1) Wiring and Connector
F63	Main Relay (#2) Short Circuit	Check Main Relay (#2) Wiring and Connector
F64	Main Relay (#2) Open Circuit	Check Main Relay (#2) Wiring and Connector
F65	Drive Motor Short Circuit	Check Drive Motor Wiring and Connector
F67	Brush Motor (Left) Short Circuit	Check Brush Motor (Left) Wiring and Connector
F68	Brush Motor (Right) Short Circuit	Check Brush Motor (Right) Wiring and Connector
F69	Vacuum Motor Short Circuit	Check Vacuum Motor Wiring and Connector
F70	Scrub Head Actuator Short Circuit	Check Scrub head actuator Wiring and Connector
F71	Squeegee Actuator Short Circuit	Check Squeegee actuator Wiring and Connector

## TECHNICAL SPECIFICATIONS
