SAFETY PRECAUTION

Carefully read and understand this manual before operating this machine.
This machine must be grounded!

This machine shall be grounded while in use to protect the operator from electric shock. Grounding provides a path of least resistance for electric current. This machine is equipped with a cord having an equipment-grounding conductor and grounding plug. The plug must be plugged into an appropriate outlet that is properly installed and grounded in accordance with all local codes and ordinances. Do not remove the ground pin under any circumstances.

This machine is for use on a nominal 120-volt circuit and has a grounding plug that resembles the plug illustrated in Figure. Make sure that the machine is connected to an outlet having the same configuration as the plug. No adapter should be used with this machine.

This machine is intended for commercial use. It is constructed for use in an indoor environment and is not intended for any other use. Use only recommended accessories.

1. Do not operate machine:

- Unless trained and authorized.
- In flammable or explosive areas.
- With a damaged cord or plug.
- If not in proper operating condition.
- Unless you have read and understand the operator's manual.
- With the use of extension cords.
- In outdoor areas and standing water.

2. Before operating machine:

- Make sure all safety devices are in place and operating properly.

3. When using machine:

- Do not run machine over cord.
- Do not pull cord around sharp edges or corners.
- Do not handle plug with wet hands.
- Report machine damage or faulty operation immediately.
- Do not pull machine by cord or plug.
- Do not unplug by pulling on the cord.
- Do not stretch cord.
- Keep cord away from heated surfaces.

4. Before leaving or servicing machine:

- Turn off machine.
- Unplug cord from outlet.

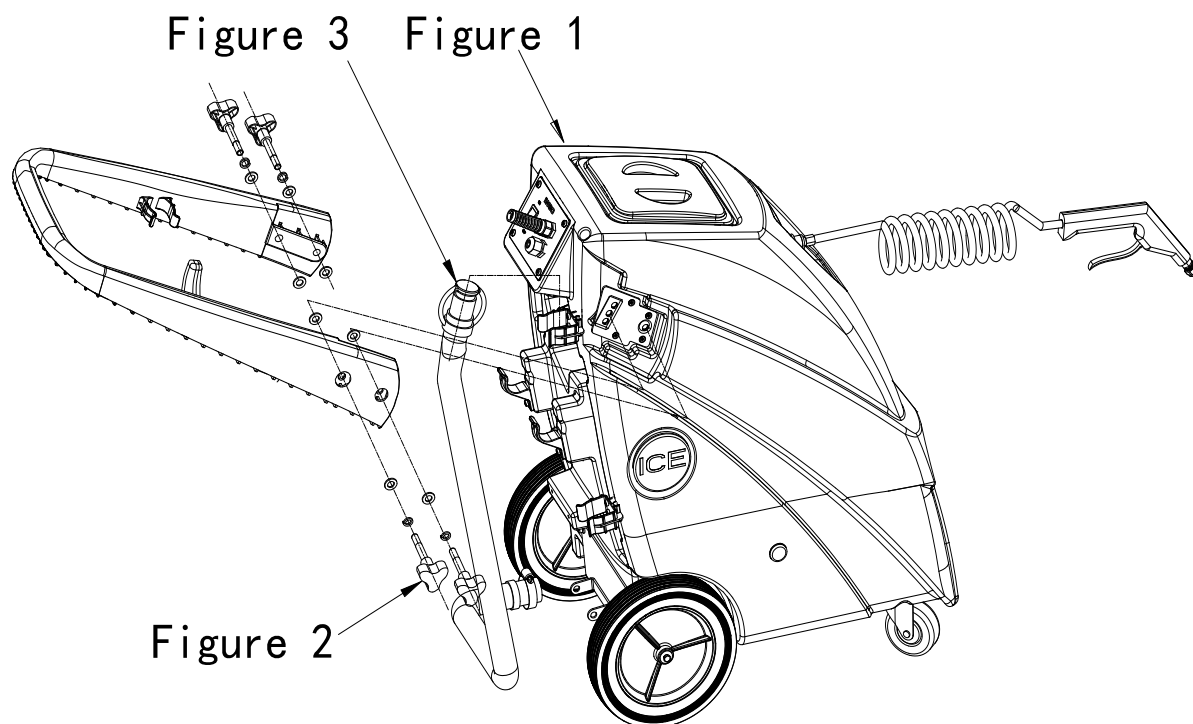

5. When servicing machine:

- Unplug cord from outlet.
- Use manufacturer supplied or approved replacement parts.

To avoid electrical shock, please replace the power cord immediately if any damage is being detected. The replacement must be performed only by an authorized person or by our customer service center.

Handle Assembly Instructions

Attaching Handle:

- 1) Remove handle from ship positiong (Figure 1).
- 2) Realign handle as show and screw knobs (Adjustable handle has three height) (Figure 2).
- 3) Attach Drain hose (Figure 3).

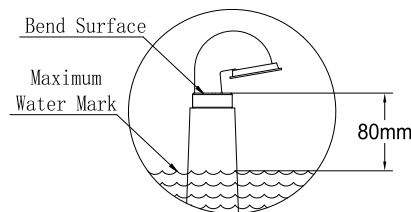

Operation of Disinfection

- !** Read operators manual thoroughly prior to operating or servicing this machine.
Be sure that the handle is properly assembled on machine body prior to operating .

DISPERSING

- 1) Remove clear window .
- 2) Connect drain hose to the machine body.
- 3) Make sure that the tank is full with disinfectant cleaner.

- !** Disinfectant cleaner should not exceed the Maximum Water Mark.
The distance between the Maximum Water Mark and the Bend Surface is 80mm.

- 4) Attach appropriate accessory tool for the job to be completed.
- 5) Make sure the Main Power Switch is in the OFF position, then plug power cord into a grounded outlet.

- !** Do not use an extension cord in conjunction with the standard power cord.
- 6) When using for disinfection, make sure to turn the power switch to “on” position.
 - 7) To prevent odors in the disinfection tank, once not in use, drain contents in disinfection tank.

DRAINING THE TANK

- 1) Unplug machine from power outlet.
- 2) Transport machine to nearest floor drain or bucket.
- 3) Remove drain hose from rear of machine, and drain the contents of the tank.
- 4) After the contents have drained, remove the clear window and rinse the tank with clean water.
- 5) Place drain hose back in the correct drain hose clip.

MAINTENANCE

To keep the machine performing well for many years, please follow the following maintenance procedures.

Always confirm that the machine is unplugged prior to performing any maintenance or repairs.

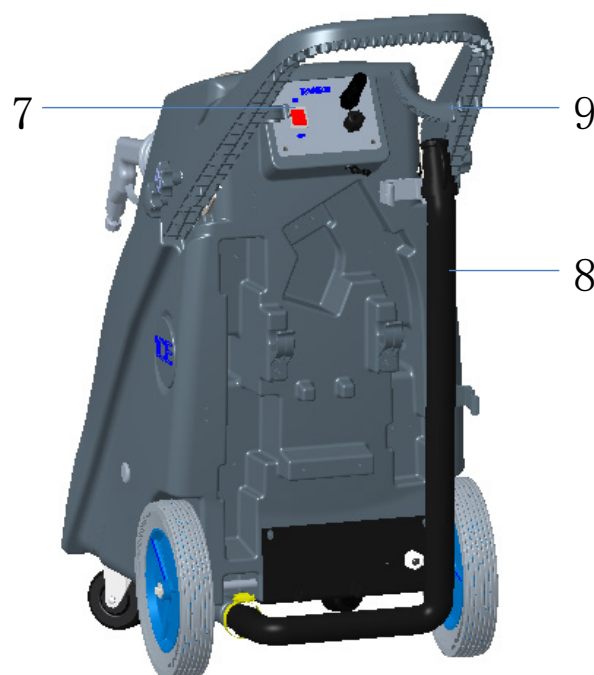

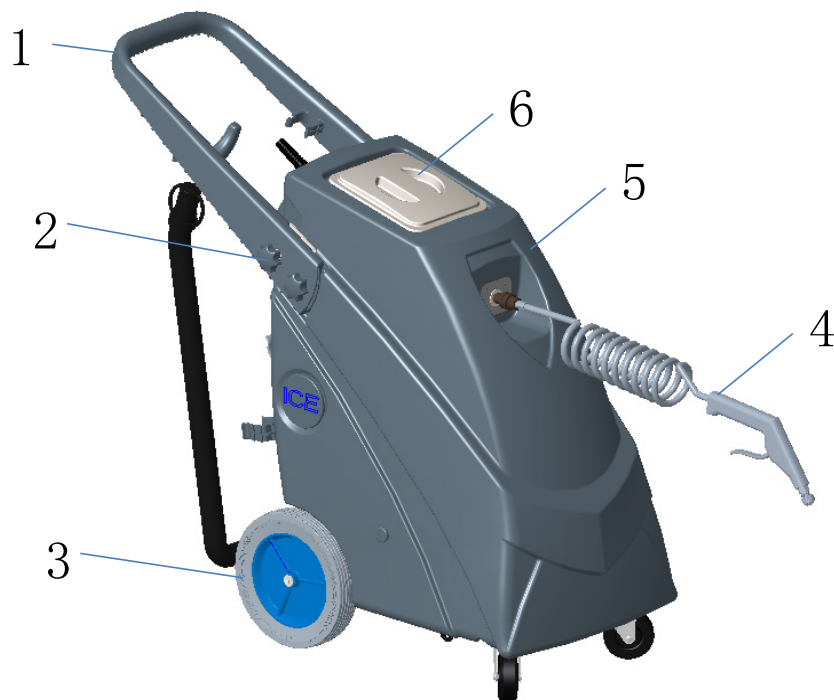

- 1) Unplug machine as soon as you are done using it.
- 2) Check power cord for any damage. If any damage is detected, replace the cord immediately.
- 3) Lubricate casters with a water resistant lubricant every month
- 4) Check machine for loose or missing nuts and bolts, and replace as necessary.
- 5) Check the filter, and clean it after each use
- 6) Clean the outside of the machine with a mild cleaner.

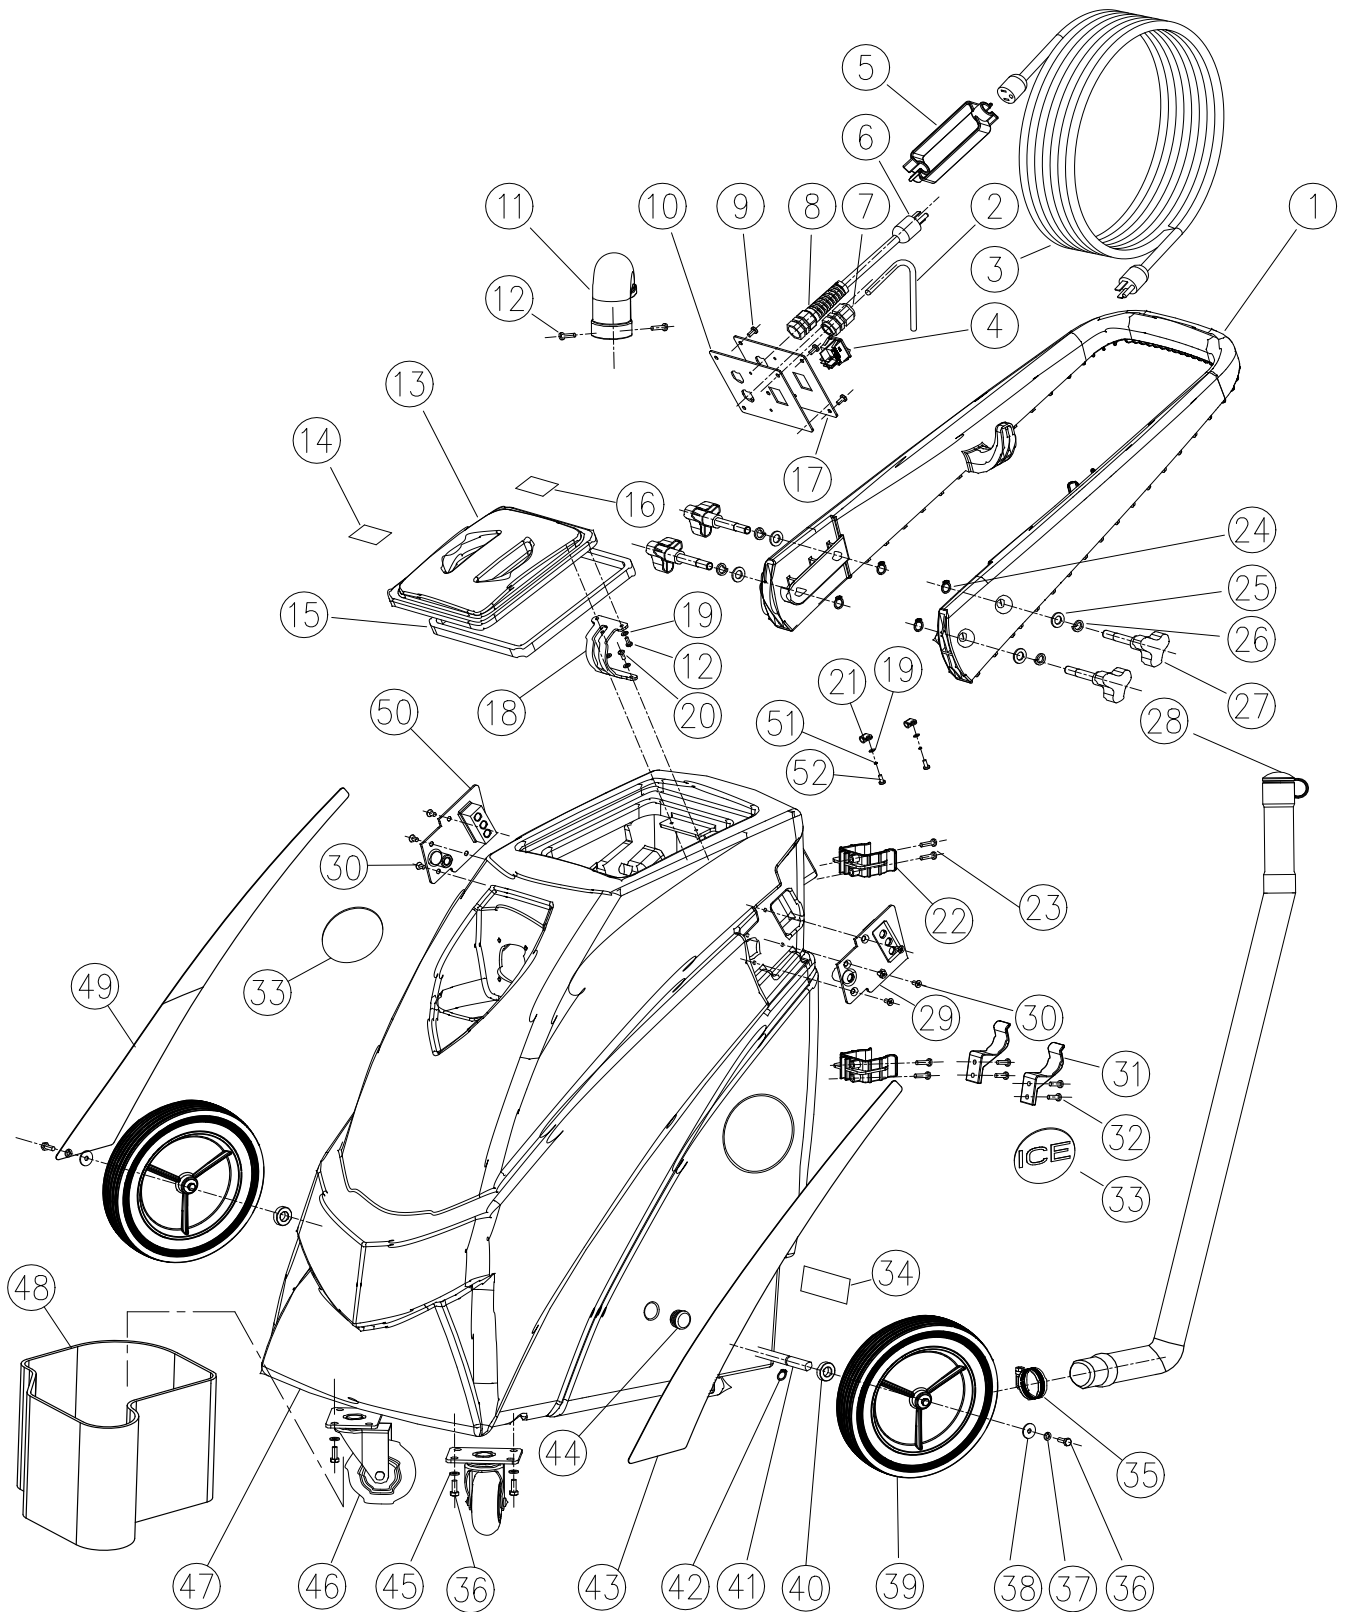

STORAGE

- 1) Unplug machine from power source and wrap cord on handle.
- 2) Store in upright position in a dry area.
- 3) Store with clear window off unit so that tank may breathe.
