Installation Date _____

HOW TO ORDER PARTS

Only use ICE Company supplied or equivalent parts. Parts and supplies may be ordered online, by phone, by fax or by mail.

1. Identify the machine model.
2. Identify the machine serial number from the data label.
3. Ensure the proper serial number is used from the parts list.
4. Identify the part number and quantity.

Do not order by page or reference numbers.

5. Provide your name, company name, customer ID number, billing and shipping address, phone number and purchase order number.

PROTECT THE ENVIRONMENT

Please dispose of packaging materials, old machine components such as batteries, hazardous fluids, including antifreeze and oil, in an environmentally safe way according to local waste disposal regulations. Always remember to recycle.

SAFETY PRECAUTIONS

Carefully read and understand this manual before operating this machine.
This machine must be grounded!

This floor/finishing machine shall be grounded while in use to protect the operator from electric shock. Grounding provides a path of least resistance for electric current. This machine is equipped with a cord having an equipment-grounding conductor and grounding plug. The plug must be plugged into an appropriate outlet that is properly installed and grounded in accordance with all local codes and ordinances. Do not remove the ground pin under any circumstances.

This machine is for use on a nominal 120-volt circuit and has a grounding plug that resembles the plug illustrated in Figure. Make sure that the machine is connected to an outlet having the same configuration as the plug. No adapter should be used with this machine.

This machine is intended for commercial use. It is constructed for use in an indoor environment and is not intended for any other use. Use only recommended accessories.

1. Do not operate machine:

- Unless trained and authorized.
- In flammable or explosive areas.
- With a damaged cord or plug.
- If not in proper operating condition.
- Without bag / filters in place.
- Unless you have read and understand the operators manual.
- With the use of extension cords.
- In outdoor areas and standing water.

2. Before operating machine:

- Make sure all safety devices are in place and operating properly.

3. When using machine:

- Only use approved burnishing pads.
- Do not pull machine by cord or plug.
- Do not stretch cord.
- Ensure the dust collection bag is in place and is tightly sealed to the machine.
- Turn power switch to “off “ prior to unplugging machine.
- Report machine damage or faulty operation immediately.
- Do not run machine over cord.
- Do not pull cord around sharp edges or corner.
- Do not unplug by pulling on the cord.
- Do not handle plug with wet hands.
- Keep cord away from heated surfaces.
- Do not pick up burning or smoking debris such as cigarettes, matches or hot ashes.

4. Before leaving or servicing machine:

- Turn off machine.
- Unplug cord from outlet.

5. When servicing machine:

- Unplug cord from outlet.
- Use manufacturer supplied or approved replacement parts.

To avoid electrical shock, please replace the power cord immediately if any damage is being detected. The replacement must be performed only by an authorized person or by our customer service center.

MACHINE COMPONENTS

Machine Description

- New structure design
- 20" Housing
- 20" Pad brush
- Engineering plastics
- Drive belt
- Handle foldable structure
- Safety lock-out switch
- Security protection in an upright
- Use twist spring adjustment pad pressure
- 50' Cord

OPERATION OF HIGH SPEED FLOOR MACHINE

THIS IS A SPECIALIZED MACHINE WHICH REQUIRES THE OPERATOR TO UTILIZE A ICE APPROVED PAD, AND MUST BE ADJUSTED PROPERLY TO ENSURE THE HIGHEST POSSIBLE PERFORMANCE AND PRODUCTIVITY.

Read operators manual thoroughly prior to operating or servicing this machine.

General Use:

- 1) Remove any obstructions or other obstacles in the area which is to be cleaned.
- 2) Remove dust recovery bag and empty it out in a trash receptacle. Replace dust recovery bag on machine, ensuring it is sealed tightly to the machine.
- 3) Place handle in upright position and tilt machine back until handle rests on the floor.

Be sure the machine is not plugged into an outlet.

- 4) Remove the pad center gripping device by unscrewing the thumbscrews.
- 5) Place a "ICE approved" burnishing pad on the pad driver and re-attach the center gripping device. (check with your ICE distributor for approved pads)
- 6) Place machine back into its upright position.
- 7) Plug power cord into grounded outlet.

Do not use an extension cord in conjunction with the standard power cord.

- 8) Adjust the handle (switch housing) height to a comfortable operating position.
- 9) To start the machine, push on the Blue safety button of the top of upper switch housing and squeeze either of the switch levers.
- 10) When the machine is in operation, both hands should be placed on the handle (switch housing).
- 11) Once the machine has reached operating speed, look at the digital pad pressure meter located on the top of the motor cover. There are 3 light colors which will help you determine optimal pad pressure for operating the machine. **YELLOW LIGHT(left):** If one yellow light is illuminated, adjustment front wheels position(forward) to increase the pad pressure. **RED LIGHT(right):** If one or both red lights are illuminated, adjustment front wheels position(backward) to reduce the pad pressure. If above two situations can not change, please replace the twist spring. **GREEN LIGHT(S):** If one, two, three, four or five green lights are illuminated, the machine is running at the optimal pad pressure and you may begin working.
- 12) When the machine is in operating, both hands should be gripping the hand.
- 13) To stop the machine at any time, simply release the switch lever, and the machine will stop automatically.

MAINTENANCE

To keep the machine performing well for many years, please follow the following maintenance procedures.

Always confirm that the machine is unplugged prior to performing any maintenance or repairs.

1. Unplug machine as soon as you are done using it.
2. Remove dust recovery bag and empty contents into a trash receptacle. inspect dust recovery bag for any damage prior to replacing it on the machine.
3. Clean the outside of the machine with a mild cleaner.
4. Check power cord for any damage. If any damage is detected, replace the cord immediately.
5. Lubricate wheels with a water resistant lubricant once a month.
6. Check machine for loose or missing nuts and bolts, and replace as necessary.
7. If the machine is used in a dusty environment, you may remove the motor cover and blow the motor clean with compressed air. This will allow for good ventilation and help the motor run cooler.

The motor is computer controlled, and utilizes computer circuitry. Do not allow this circuitry to get wet! Never store a low speed machine with the pad driver or brush mounted

STORAGE

- 1) Unplug machine from power source and wrap cord on handle.
- 2) Store in upright position in a dry area.
