

Operator & Parts Manual

Battery Automatic Floor Scrubber

Model: i20NBV

8130054 REV.05(10-2022)

READ OPERATOR MANUAL CAREFULLY!

HOW TO ORDER PARTS

Please contact your local distributor. Having the following information available will be helpful:

- Machine model name
- Serial number from serial plate
- Part # and quantity (do not order by page number)

PROTECT THE ENVIRONMENT

Please dispose of packaging materials, old machine components such as batteries, hazardous fluids, including antifreeze and oil, in an environmentally safe way according to local waste disposal regulations.

Always remember to recycle.

Specifications and parts are subject to change without notice.

SAFETY PRECAUTIONS

This machine is intended for commercial use. It is designed exclusively to scrub hard floors in an indoor environment and is not constructed for any other use. Only use recommended accessories.

All operators shall read, understand and exercise the following safety precautions:

1. Do not operate machine:

- Unless trained and authorized.
- Unless you have read and understand the operators manual.
- In flammable or explosive areas.
- If not in proper operating condition.
- In outdoors areas.

2. Before starting machine:

 Make sure all safety devices are in place and operate properly.

3. When using machine:

- Go slow on inclines and slippery surfaces.
- Follow all safety guidelines.
- Be very careful when using the machine in reverse.
- Reduce speed when turning.
- Report and fix any damage to machine prior to operating it.
- Never allow children to play on or around.
- Do not operate on inclines that exceed 5% (3°).

4. Before leaving or servicing machine:

- Stop on level surface.
- Turn off machine.

5. When servicing machine:

- Read operators manual thoroughly prior to operating or servicing this machine.
- Use manufacturer supplied or approved replacement parts.
- Secure machine with wheel blocks prior to jacking the machine up.
- Use approved jack or hoist to safely elevate the machine.
- Disconnect batteries prior to working on machine.
- Wear gloves when handling batteries or battery cables.

- Avoid any contact with battery acid.
- Avoid moving parts. Do not wear loose fitting clothing while servicing machine.

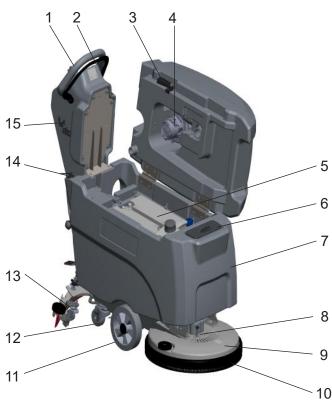

WARNING: Batteries emit hydrogen gas. Explosion or fire can result from hydrogen gas. Keep sparks and open flames away! Keep battery compartment open when charging.

WARNING: Flammable materials can cause an explosion or fire. Do not use flammable materials in tanks.

WARNING: Flammable materials or reactive metals can cause explosion or fire. Do not pick up.

MACHINE COMPONENTS

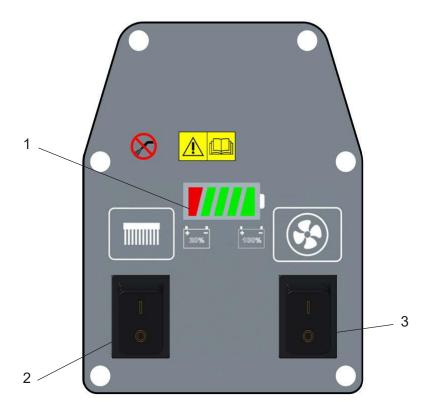

- 1. Control Handle
- 2. Control Handle Start Bail
- 3. Recovery Tank Support Stand
- 4. Vacuum Motor, 24VDC
- 5. Batteries
- 6. Bucket Fill Port/ Clean-Out Port
- 7. Solution Tank
- 8. Motor Hub Lock Pin (Disk Models)
- 9. Scrub Head Assembly
- 10. Scrub Head Skirt
- 11. Wheels, 8 Inch
- 12. Caster, 3.15 Inch
- 13. Caster, 2 Inch, Squeegee Blade Adjustment
- 14. Hose Fill-Port
- 15. Squeegee Storage Bracket
- 16. Control panel (see Panel components)
- 17. Overload protector
- 18. On-board battery charger / Window

- 19. Solution Tank Level / Drain Hose
- 20. Scrub Head Lift Pedal
- 21. Bumper Rollers
- 22. Squeegee Assembly
- 23. Squeegee Vacuum Hose
- 24. Filter Assembly
- 25. Ball Valve
- 26. Squeegee Lift Lever
- 27. Power cord, on-board Battery charger
- 28. Recovery Tank Drain Hose
- 29. Recovery Tank
- 30. Cover

PANEL COMPONENTS

- 1. Battery capacity indicator
- 2. Bush motor switch
- 3. Vacuum motor switch

MACHINE SET UP & INSTALLATION

UNCRATING MACHINE

Be sure and check packing carton for any damage. Immediately report any damage to carrier. Check the contents of package to ensure that the following items are included:

- Machine
- Requires 2-12V Batteries
- · Squeegee assembly
- · Battery Charger
- Pad Driver

INSTALLING BATTERIES

The batteries are already in the machine upon delivery; However you will need to connect the cables to the battery posts.

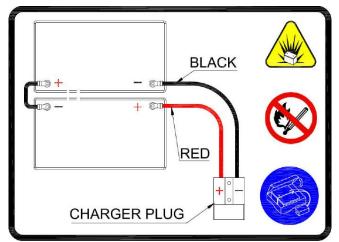

WARNING: Batteries emit hydrogen gas. Explosion or fire can result from hydrogen gas. Keep sparks and open flames away! Keep battery compartment open when charging.

- 1. Make sure vacuum motor and brush switch are in the OFF position
- 2. Open recovery tank to gain access to battery compartment.
- Carefully place the two batteries into the compartment as shown in figure below. Place the battery brace at the rear of the two batteries.
 DO NOT DROP BATTERIES INTO

DO NOT DROP BATTERIES INTO COMPARTMENT!

4. Connect battery cables to posts in numbered order as shown in drawing below.

RED to POSITIVE and BLACK to NEGATIVE.

MACHINE SET UP

PRE-OPERATION CHECKS

- 1. Sweep or dust mop the surface to be cleaned.
- 2. Check battery meter to make sure batteries are fully charged. (See BATTERY CHARGING).
- 3. Check that squeegee is properly installed.
- 4. Check that brush / pad is properly installed.

INSTALLING PAD DRIVER OR BRUSH

- 1. Ensure that the machine is turned off.
- 2. Step down on the scrub head lift pedal (see machine components, item #20) to raise the scrub head off the floor.
- 3. If using a Pad Driver, first attach the appropriate pad to the pad driver surface.
- Turn the brush motor hub until the slot with the spring clip is visible through the scrub head window.
- 5. Mount the pad driver or brush to the brush motor hub by lining up the three studs with the three holes in the brush motor hub. Once in the holes, rotate the driver toward the spring clip to lock the pad driver into place.
 - If necessary, press down on the motor hub lock pin (see machine componts, item # 8) to lock motor hub in place.

MOUNTING THE SQUEEGEE ASSEMBLY

- Lift the squeegee lift lever (see machine components, item #26) to the upward position.
- Mount the squeegee assembly to the squeegee pivot bracket. Make sure the knobs are completely seated into the slots before securing knobs.
- Connect the vacuum hose to the squeegee assembly. Loop the hose by using the hose clip provided.
- 4. Check the squeegee blades for proper adjustment.

FILLING THE SOLUTION TANK

The machine is equipped with a hose fill-port (see machine components, item #14) at the rear of the machine, and a bucket fill-port at the front of the solution tank. (see machine components, item #6) Fill the solution tank to the "16Gal" level on the solution tank sight gauge. When using the bucket fill-port, stop filling when the level reaches the bottom edge of the fill-port.

Convertional scrubbing - Fill solution tank with water (not to exceed 60°C/140°F. Pour a recommended cleaning detergent into the solution tank according to mixing instructions on the container)

NOTE: When filling the solution tank with a bucket, make sure that the bucket is clean. Do not use the same bucket for filling and draining the machine.

WARNING: Do not put any flammable materials into solution tank. This can cause an explosion or a fire. Only use recommended cleaning chemicals. Contact Dealer for recommendations on proper chemicals.

MACHINE OPERATION

WARNING: Do not operate machine unless you have read and understand this manual.

- 1. Lower squeegee assembly to the floor by lowering the squeegee lift lever (see machine components, item #26).
- 2. Lower the scrub head to the floor by stepping on the scrub head lift pedal (see machine components, item #20).
- 3. Turn the power button switch (see machine components, item #20) to the on (I) position.
- 4. Check the battery meter (see Panel components, item #1), if the battery is very low, Please DO NOT continue to operate the machine and recharge the batteries immediately.
- 5. To change solution flow use the ball valve to increase or decrease flow rate .When ball valve is in horizontal position,the solution flow is OFF turn to vertical position for maximum flow rate.
 NOTE: Solution will not begin to flow until the control handle bail is pulled.
- 6. Turn on the vacuum motor switch (see Panel components, item #3).
- 7. i20NBV: Pull the control handle bail (see machine components, item #2) backwards to start scrubbing by moving the machine forward.

- **NOTE:** 45-60 meters (150-200 ft) per minute is the recommended scrubbing speed.
- 8. To stop scrubbing, release the control handle bail, raise the scrub head and the squeegee assembly.

WHILE OPERATING MACHINE

WARNING: Fire or Explosion Hazard. Do Not Pick Up Flammable Materials or Reactive Metals.

- Go slow on inclines and slippery surfaces. Do not operate the machine on inclines that exceed 5% (3°).
- 2. Do not keep the machine in the same position with pad / brush spinning, keep the machine moving to prevent damage to floor finish.
- 3. If the squeegee assembly leaves streaks on the floor, raise the squeegee off the floor and wipe the blades down with a damp cloth. Pre-sweep the area to prevent leaving streaks on the floor.
- 4. Pour a recommended defoamer into the recovery tank if excessive foam appears.

WARNING: Do not allow foam to enter the float shut-off screen, vacuum motor damage will result. Foam will not activate the float shut-off screen.

5. Occasionally check the battery meter (see Panel components, item #1). When the battery is very low, stop scrubbing and recharge the batteries.

WARNING: When battery is very low, do not continue to operate the machine. Battery damage may result.

6. When the solution tank runs empty, raise the brush head off the floor. Keep the squeegee down and continue to vacuum until all the dirty water is picked up.

NOTE: See **TANK DRAINING** section to learn how to drain recovery and solution tanks.

CIRCUIT BREAKER

The machine is equipped with a resettable circuit breaker (see machine components, item #21) to protect electronic components. If the circuit breaker should trip, it can't be reset immediately. You must first determine what caused the breaker to trip, and allow electronic components to cool down and then you can manually reset the circuit breakers.

NOTE: Contact Dealer for machine repairs.

- solution tank, check the filter screen and clean up it if necessary.
- 3. Rinse the solution tank with clean water after every use. This will help prevent chemical buildup and clogging of the solution lines.
- 4. After rinsing out the tank, securely reconnect the tank level hose to the hose fitting, replace the filter assembly cover and be sure the filter screen and the "O" ring is in the correct position.

BATTERY CHARGING

WARNING: Fire or Explosion Hazard.
Batteries Emit Hydrogen Gas. Keep Sparks and
Open Flame Away. Keep Battery Compartment
Propped Open When Charging.

NOTE: Use only approved chargers with the following specifications:

- Automatic shut-off circuit
- Deep cycle charging
- Output current of 10-20 Amps
- Output voltage of 24 volts
- 1. Place machine in a well ventilated area.
- 2. Turn the machine off.
- 3. If charging wet (lead acid) batteries check the fluid level before charging.
- 4. Connect the charger's AC power supply cord (see machine components, item #33) to a properly grounded receptable.
- 5. Prop up the recovery tank by the support stand (see machine components, item #3) for ventilation when charging.
- 6. The charger will automatically begin to charge and will automatically shut-off once the batteries are fully charged.
- 7. Upon completion of charging, disconnect the AC power supply cord.

TANK DRAINING

- 1. Turn the machine off on.
- 2. With the squeegee and scrub head in their "up" position, transport machine to approved area for draining tank(s).

DRAINING THE RECOVERY TANK

Any time scrubbing is completed, or when refilling solution tank, the recovery tank should be drained and cleaned.

WARNING: If the recovery tank is not arained when the solution tank has been refilled, foam or water may enter the float shutoff screen and cause damage to the vacuum motor.

- 1. While holding the drain hose (see machine components, item #28) upward, remove the cap and lower hose to drain.
- 2. Open the recovery tank cover and rinse out the tank. Use a rag to remove any excess dirt.
- 3. Clean the float shut-off screen and debris tray located in the recovery tank.

DRAINING THE SOLUTION TANK

Any time scrubbing operation is completed, the solution tank should be drained and cleaned.

- Pull the solution tank level hose (see machine components, item #19) off the hose fitting, this will allow the solution to flow freely into a bucket or floor drain.
- 2. Remove the cover of the filter assembly (see machine components, item #24) to drain the

PREVENTATIVE MAINTENANCE

WARNING: Before performing any maintenance on the machine, be sure that the power is turned off, or the batteries are disconnected!

WARNING: Repairs are to be completed by Dealer only. Any repairs completed by unauthorized persons will avoid the warrenty.

DAILY MAINTENANCE

- 1. Remove pad driver/ brush and clean with approved cleaner.
- Drain recovery and solution tanks completely and rinse out with clean water. Visually check the recovery tank for debris and clean out as necessary.
- 3. Raise the squeegee assembly off floor and wipe it down with a damp towel. Be sure to store the squeegee in the up position.
- 4. Remove the float shut-off assembly and rinse it out with clean water.
- 5. Clean machine with an approved cleaner and a damp towel.
- 6. Recharge the batteries.
- 7. Check the condition of the squeegee blade wiping edge, rotate blade if worn.

MONTHLY MAINTENANCE

- 1. Clean the battery tops to prevent corrosion.
- 2. Check for loose battery cable connections.
- 3. Inspect and clean the recovery tank cover seal. Replace it if damaged.
- 4. Lubricate all grease points and pivot points with silicon spray and approved grease.
- 5. Check the machine for loose nuts and bolts.
- 6. Check the machine for leaks.

MOTOR MAINTENANCE

- 1. Contact Dealer for any motor maintenance.
- 2. Motor should have the brushes checked every 250 hours. Brushes should be replaced when they are worn to a length of 10 mm or less.

- and water is the best way to keep the batteries corrosion free. DO NOT ALLOW THE BAKING SODA / WATER SOLUTION TO ENTER THE BATTERY CELLS.
- 3. Use a wire brush with the baking soda solution to properly clean the battery posts and connections.
- 4. Check battery connections for wear and loose terminals. Replace if necessary.

MACHINE STORAGE

- 1. Always store the machine indoors.
- 2. Always store the machine in a dry area.
- 3. Always store the machine in its upright position.
- 4. Always store the machine with the pad driver/brush raised off the floor.
- 5. Always store the machine with the squeegee assembly raised off the floor.
- If storing in an area which may reach freezing temperatures, be sure to drain all fluids from the machine prior to storage. Any damage caused by freezing temperatures will not be covered by the warranty.
- 7. Drain the recovery tank.
- 8. Drain the solution tank of all fluid.

BATTERY MAINTENANCE

WARNING: Batteries emit hydrogen gas and an explosion or fire can result. Keep sparks and fire away from batteries at all times.

WARNING: Whenever servicing batteries, be sure to wear protective gloves. Avoid contact with battery acid at all times.

NOTE: For the best machine performance, keep batteries charged at all times. Do not let them sit in a discharged condition.

- Always follow the battery charging directions as outlined in the BATTERY CHARGING section of this manual.
- 2. Keep battery tops and terminals free from corrosion. A strong solution of baking soda

ADJUSTMENT OF SQUEEGEE ASSEMBLY

Model: i20NBV

Tools: Offset spanner (17mm)

Gauge block (2mm)

For optimum squeegee blade performance, the squeegee assembly casters might need to be adjusted to the floor type and squeegee blade wear.

Adjustment Process:

- 1. Turn off the machine after you lower the squeegee assembly down.
- 2. Clean up foreign matter or dirty surfaces on the squeegee blades.
- 3. Check that the squeegee Blades are installed correctly and not worn out or damaged.

 (The assembly needs to be placed on a level surface. And the front/rear squeegee should be close to the Horizontal plane).
- 4. Check the caster and adjust it to approximately 2MM.

To adjust the caster height, loosen the top nut with 17mm Spanner wrench and Turn the adjustment nut until properly adjusted (Step 4). After adjusting, tighten the top nut. Repeat step for the other caster.

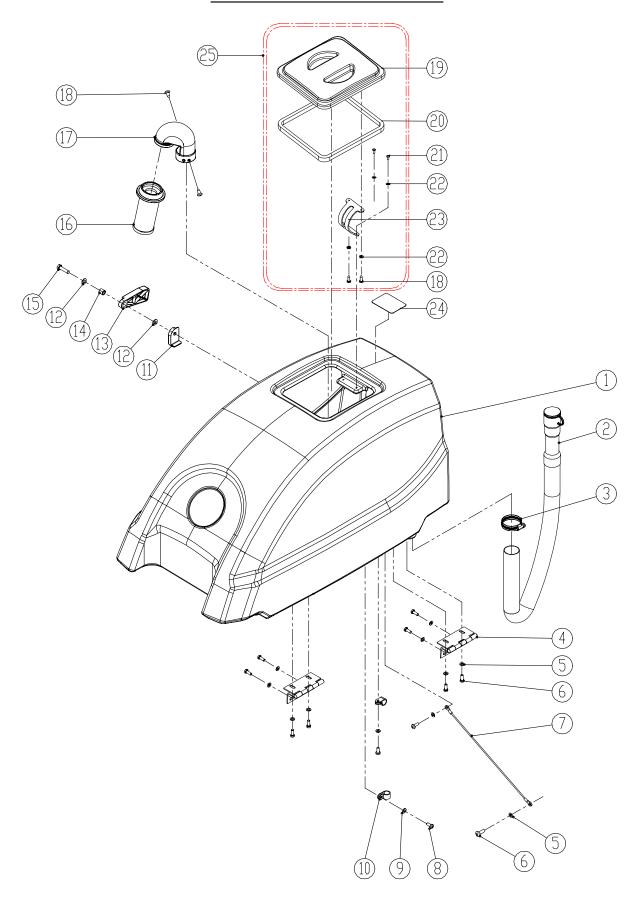

BASIC TROUBLESHOOTING

| PROBLEM | CAUSE | SOLUTION |
|------------------|--|---|
| | Control handle bail not pulled | Pull control handle bail |
| | Batteries need to be charged | Charge batteries |
| Machine will not | | Replace batteries |
| operate | Loose batteries connection | Tighten the connector |
| | Circuit breaker tripped | Reset breaker |
| | Faulty button switch | Contact Dealer |
| | Scrub head is raised off floor | Lower scrub head |
| | Faulty scrub head (up/down) switch | Contact Dealer |
| Brush motor will | Faulty control handle bail switch | Contact Dealer |
| not operate | Faulty brush motor or wiring | Contact Dealer |
| | Worn motor carbon brushes | Contact Dealer |
| Vacuum motor | Faulty vacuum motor or wiring | Contact Dealer |
| will not operate | Worn motor carbon brushes | Contact Dealer |
| | Ball valve set too low or shut off | Turn on the ball valve |
| Little or no | Solution flow control knob set too low or shut-off | Adjust solution control flow knob |
| solution flow | Clogged solution tank filter or solution hose | Clean solution tank filter or flush out solution hose |
| | Clogged solution solenoid valve | Remove valve and clean |
| | Recovery tank is full | Drain recovery tank |
| | Loose drain hose cap | Tighten cap |
| | Clogged float shut-off screen located in recovery tank | Clean screen |
| | Clogged squeegee assembly | Clean squeegee assembly |
| | Worn squeegee blades | Replace or rotate squeegee blades |
| Poor water pick | Incorrect squeegee blade deflection | Adjust squeegee blade height |
| up | Loose vacuum hose connections | Secure hose connections |
| | Clogged vacuum hose | Remove clogged debris |
| | Damaged vacuum hose | Replace vacuum hose |
| | Recovery tank cover not in place | Properly position cover |
| | Damaged recovery tank cover seal | Replace seal |
| | Faulty vacuum motor | Contact Dealer |
| | Low battery charge | Recharge batteries |
| | Low battery charge | Fully recharge batteries |
| Short run time | Defective batteries | Replace batteries |
| | Faulty battery charger | Repair or replace battery charger |
