Installation Date \_\_\_\_\_

### HOW TO ORDER PARTS

Only use ICE Company supplied or equivalent parts. Parts and supplies may be ordered online, by phone, by fax or by mail.

1. Identify the machine model.
2. Identify the machine serial number from the data label.
3. Ensure the proper serial number is used from the parts list.
4. Identify the part number and quantity.  
Do not order by page or reference numbers.
5. Provide your name, company name, customer ID number, billing and shipping address, phone number and purchase order number.

### PROTECT THE ENVIRONMENT

Please dispose of packaging materials, old machine components such as batteries, hazardous fluids, including antifreeze and oil, in an environmentally safe way according to local waste disposal regulations.

Always remember to recycle.

### ICE Company Limited

XiangShi Road LiaoBu DongGuan GuangDong China

Tel: 0769 - 81869000

Fax: 0769 - 81863000

Specifications and parts are subject to change without notice.

## SAFETY PRECAUTIONS

This machine is intended for commercial use. It is designed exclusively to scrub hard floors in an indoor environment and is not constructed for any other use. Only use recommended accessories.

**All operators shall read, understand and exercise the following safety precautions:**

### 1. Do not operate machine:

- Unless trained and authorized.
- Unless you have read and understand the operators manual.
- In flammable or explosive areas.
- With brake disabled.
- If not in proper operating condition.

### 2. Before starting machine:

- Make sure all safety devices are in place and operate properly.
- Check brakes and steering for proper operation.

### 3. When using machine:

- Go slow on inclines and slippery surfaces.
- Follow all safety guidelines.
- Be very careful when using the machine in reverse.
- Reduce speed when turning.
- Report and fix any damage to machine prior to operating it.
- Never allow children to play on or around.

### 4. Before leaving or servicing machine:

- Stop on level surface.
- Turn off machine.

### 5. When servicing machine:

- Read operators manual thoroughly prior to operating or servicing this machine.
- Use manufacturer supplied or approved replacement parts.
- Secure machine with wheel blocks prior to jacking the machine up.
- Use approved jack or hoist to safely elevate the machine.
- Disconnect batteries prior to working on machine.
- Wear gloves when handling batteries or battery cables.

- Avoid any contact with battery acid
- Avoid moving parts. Do not wear loose fitting clothing while servicing machine.

**WARNING: Batteries emit hydrogen gas. Explosion or fire can result from hydrogen gas. Keep sparks and open flames away! Keep battery compartment open when charging.**

**WARNING: Flammable materials can cause an explosion or fire. Do not use flammable materials in tanks.**

**WARNING: Flammable materials or reactive metals can cause explosion or fire. Do not pick up.**

## MACHINE COMPONENTS

1. Solution tank
2. Hose fill port & Cap
3. Squeegee assembly
4. Wheels, 10 inch
5. Scrub head assembly
6. Side squeegee assembly
7. Watching window, on-board battery charger
8. Brake pedal
9. Propel pedal
10. Front drive wheel

11. Operator seat
12. Steering wheel
13. LED light, work
14. Adjusting handle, seat
15. Off-board battery charger receptacle
16. Detergent level watching window
17. Warning light
18. Recovery tank cover
19. Recovery tank
20. Cup holder
21. Cap
22. Detergent bottle
23. Battery box

## MACHINE COMPONENTS

- 24. Directional switch
- 25. Main power key switch
- 26. Emergency stop switch
- 27. Warning light switch
- 28. Vacuum motor switch & indicator
- 29. Detergent dosage adjusting buttons & indicator
- 30. Batteries meter
- 31. LED display screen
- 32. Fault indicator
- 33. Fault code
- 34. Fault message
- 35. Hour meter
- 36. Solution flow adjusting buttons & indicator
- 37. Horn button
- 38. 1-Step switch & Indicator
- 39. Brush pressure adjusting button & indicator
- 40. Drain hose, recovery tank
- 41. Drain hose, solution tank
- 42. Vacuum hose

## MACHINE SET UP & INSTALLATION

### UNCRATING MACHINE

Be sure and check packing carton for any damage. Immediately report any damage to carrier. Check the contents of package to ensure that the following items are included:

- Machine
- 4-6V Batteries
- Squeegee assembly
- 2-Pad drivers

1. Uncrate the wooden box, place the top board on the edge of pallet, lie in the front of the machine, as below shown.

**WARNING: Do not operate machine unless you have read & understood this manual.**

2. Install batteries.(see *INSTALLING BATTERIES*)
3. Turn on the Main power key switch (machine components, #25), make sure the Squeegee assembly (machine components, #3) and the Scrub head assembly (machine components, #5) is off the floor.
4. Sit in the Operator seat (machine components, #11), hold the Steering wheel (machine components, #12), press the Propel pedal (machine components, #9) and driving slowly the machine down from the slope.

### INSTALLING BATTERIES

**WARNING: Batteries emit hydrogen gas. Explosion or fire can result from hydrogen gas.Keep sparks and open flames away! Keep battery compartment open when charging.**

**Recommended battery spec:**

4-6V, 260AH@20HR deep cycle batteries.

**Max. batteries dimensions :**

300mm (L) X 180mm (W) X 290mm (H)

1. Turn the Main power key switch off.
2. Remove the Operator seat & the Battery box (machine components, #23).

3. Carefully place the batteries into the compartment as shown in figure below. Place the battery brace at the rear of the batteries.

**NOTE: Do not drop the batteries into the compartment!**

4. Connect battery cables to posts in numbered order as shown in drawing below.

**NOTE: RED to POSITIVE and BLACK to NEGATIVE.**

5. Reinstall the Operator seat and the Battery box.

### MACHINE SET UP

#### INSTALLING BRUSHES OR PADS

1. Turn off the 1-Step switch (machine components, #38) and raise the Scrub head assembly off the floor, then stop machine on the level surface, remove the key and ensure the machine is turned off.
2. If using the pad driver, first attach the appropriate pad to the pad driver surface.
3. Align the pad driver or brush under the motor hub and push it upward to engage.

4. To remove the pad driver or brush, raise the scrub head and remove the Side squeegee assembly (machine components, #6), push the edge of brush downward.

5. For Orbital head model RS28-OB, you need to attach a rectangular 28in (710mm) × 14in (356mm) pad to the Orbital Pad driver, align the pad to the orbital pad driver, press from top to back and side to side to alignment.

## **MOUNTING THE SQUEEGEE ASSEMBLY**

1. Turn off the 1-Step switch and raise the Squeegee assembly off the floor.
2. Mount the squeegee assembly to the squeegee pivot bracket. make sure the knobs are completely seated into the slots before securing knobs.
3. Connect the Vacuum hose (machine components, #42) to the squeegee assembly. Loop the hose by using the hose clip provided.
4. Check the squeegee blades for proper adjustment.

## **FILLING THE SOLUTION TANK**

The machine is equipped with a Hose fill-port (machine components, #2) at the side of the machine, and a bucket fill-port located under the recovery tank.

**NOTE: Before accessing the bucket fill-port make sure that the recovery tank is empty. When filling the solution tank with a bucket, make sure that the bucket is clean. Do not use the same bucket for filling and draining the machine.**

**WARNING: Do not put any flammable materials into solution tank. this can cause an explosion or a fire.**

## **FILLING THE DETERGENT BOTTLE**

The machine is equipped with a 6 liters Detergent bottle (machine components, #22). Open the Cap (machine components, #21) you can fill detergent, and watch the liquid level on the Detergent level watching window (machine components, #16).

The ratio of water and detergent is 0~5%, you can adjust this ratio via pressing the Detergent dosage adjusting buttons (machine components, #29).

**NOTE: Only use recommended cleaning chemicals. Contact your janitorial supply distributor for recommendations on proper chemicals.**

## **MACHINE OPERATION**

**WARNING: Do not operate machine unless you have read and understand this manual.**

## **PRE-OPERATION CHECKS**

1. Check the tank cover seals for damage.
2. Drain the recovery tank, check the vacuum fan inlet filter, clean them if necessary.
3. Check the vacuum hose for debris or blockage.
4. Check the squeegees for damage, wear and for deflection adjustment.
5. Check whether Pad/Brush is installed properly .
6. Check the brakes and steering for proper operation.

## **OPERATION THE MACHINE**

1. Sit in the Operator seat, adjusting the seat to comfortable place by pushing the Seat adjustment handle (machine components, #14).

**NOTE: The machine will not travel unless the operator is sitting in the operator seat.**

2. Turn on the machine.  
Check the LED display screen (machine components, #31) , if there are fault codes (machine components, #33) and the Fault indicator (machine components, #32) is blink, please Do Not operation the machine unless the faults have been eliminated (please see FAULT CODES AND ELIMINATE section).
3. Select the preferred settings by pressing the Brush pressure adjusting buttons (machine components, #39) , Solution flow adjusting buttons (machine components, #36) and Detergent dosage adjusting buttons.

**NOTE: Use the minimal pressure and flow as possible.**

4. Turn on the 1-Step switch, the Scrub head assembly and the Squeegee assembly will lower down automatically, all the presetting functions will turn on.
5. The machine can scrub in both forward and backward, place the Directional switch (machine components, #24) in the forward direction is to move forward, backward is to move backward. The horn will sound and the squeegee will raise automatically (the vacuum motor will turn off after a short delay) when drive machine backwards. This is to prevents damaging the squeegee.

**NOTE: Go slow when drive machine backwards.**

6. Press the Propel pedal, the machine start scrubbing, the speed can be adjusted by controlling the force of foot stepping, light is slow, heavy is fast.

**NOTE: Go slow on inclines and slippery surfaces.**

7. To stop scrubbing, turn off the 1-Step switch, the scrub head will raise automatically, the squeegee will also raise after a short delay (the vacuum indicator flashing), please keep moving until the dirty water is picked up, and then release the propel pedal and stop scrubbing.
8. Turn off the machine.

## **BRAKE DEVICE**

The machine is driven by the Front drive wheel (machine components, #10), that is equipped with a brake device. When you release the Propel pedal, the machine will stop travel, the park brake will engage after a short delay.

The machine is equipped with a Brake pedal (machine components, #8), that can be used to control the machine if quicker stopping is needed or if operating on an incline.

## **EMERGENCY STOP BUTTON**

The machine is equipped with an Emergency stop button (machine components, #26), please push it if an emergency, that will shut off all power of machine and brake immediately.

To restart the machine, please reset the Emergency stop button, and turn off the Main power key switch, then turn on key switch.

**NOTE: Please hold the steering wheel when emergency stop.**

## **WHILE OPERATING MACHINE**

**WARNING: Fire Or Explosion Hazard. Do Not Pick Up Flammable Materials Or Reactive Metals.**

1. Go slow on inclines and slippery surfaces, go slow when turn and reverse. Do not operate the machine on inclines that exceed 7% (4°).
2. Drive machine in a straight path as possible, avoid turning the Steering wheel too sharply when machine is in motion. avoid sudden turns except emergencies.
3. Do not keep the machine in the same position with pad / brush spinning, keep the machine moving to prevent damage to floor finish.
4. If the squeegee assembly leaves streaks on the floor, raise the squeegee off the floor and wipe

the blades down with a damp cloth. Pre-sweep the area to prevent leaving streaks on the floor.

5. To obtain the optimum cleaning performance, you can adjust the brush pressure, solution flow and detergent dosage as your required. If poor picking up water performance is observed, please stop scrubbing and check the squeegee blade, adjust or replace if necessary.
6. If the dirty water path exceed the width of squeegee, please adjust the side squeegee assembly.
7. Pour a recommended defoamer into the recovery tank if excessive foam appears.

**WARNING: The foam do not activate water level switch, excessive foam may result in vacuum motor damage.**

8. Press the Horn button (machine components, #37) to alert if necessary.
9. The machine is equipped with a Warning light (machine components, #17), you can select turn ON or OFF by the Warning light switch (machine components, #27).
10. If there is a fault code F10 (Batt low) on the LED display screen, the machine will stop scrubbing and alarm, please drive the machine to charging.
11. If there is a fault code F08 (Rec Tank Full) on the LED display screen, the vacuum motor will stop working and alarm, please drive the machine to drain water.  
If there is a fault code F09 (Soln Tank Empty) on the LED display screen, the Detergent system will stop working and alarm, please fill the solution tank.
12. If there are other fault codes on the LED display screen, please turn off the machine, eliminate the fault (please see FAULT CODES AND ELIMINATE section), then restart machine.
13. For heavily soiled areas, please use DOUBLE SCRUBBING mode.  
The first time: Turn on the 1-Step switch, then press the Vacuum motor switch (machine components, #28), its indicator will turn off and the squeegee will raise automatically, then start to scrubbing this areas without picking up water.  
The second time: turn on the Vacuum motor switch, the squeegee will lower down automatically, and then start to scrubbing and picking up water.
14. If you only want to pick up water needn't scrubbing, Turn on the Vacuum motor switch (squeegee will lower down) and turn off the 1-Step switch (if it is ON), the scrub head will raise and then start to working.

## TANK DRAINING

### DRAINING THE RECOVERY TANK

Any time scrubbing is completed, or when refilling solution tank, the recovery tank should be drained and cleaned.

**! WARNING:** If the recovery tank is not drained when the solution tank has been refilled, foam or water may enter the float shut-off screen and cause damage to the vacuum motor.

1. While holding the Recovery tank drain hose (machine components, #40) upward, remove the cap and lower hose to drain.
2. Open the Recovery tank cover (machine components, #18) and rinse out the tank. Use a rag to remove any excess dirt. Clean the vacuum fan inlet filter located in the recovery tank .

### DRAINING THE SOLUTION TANK

Any time scrubbing operation is completed, the solution tank should be drained and cleaned.

1. While holding the Solution tank drain hose (machine components, #41) upward, remove the cap and lower hose to drain.
2. Rinse the solution tank with clean water after every use. This will help prevent chemical buildup and clogging of the solution lines.

## BATTERY CHARGING

**! WARNING:** Fire Or Explosion Hazard. Batteries Emit Hydrogen Gas. Keep Sparks and Open Flame Away. Keep Battery Compartment Propped Open When Charging.

*Use only approved chargers with the following specifications:*

- Automatic shut off circuit
- Deep cycle charging
- Output current of 20-30 Amps
- Output voltage of 24 volts

### ON-BOARD BATTERY CHARGER

As standard configuration, the machine is equipped with the On-board battery charger. The settings of On-board battery charger had been set for the recommended batteries type.

**! WARNING:** The On-board battery charger setting's change are to be completed by authorized service centers only. Failure to properly set will result in the batteries or charger damage.

1. Transport the machine to a well ventilated area.
2. Turn the machine off.
3. If charging wet (lead acid) batteries check the fluid level before charging.
4. Prop up the Operator seat by the support stand for ventilation.
5. Connect the charger's AC power supply cord to a properly grounded receptable.
6. The charger will automatically begin to charge, you can watching the charging status on the window (machine components, #7), once the charging cycle begins, the indicator lights will progress from red, yellow to green. when the green indicator light comes on, the charging cycle is done. Unplug the charger cord.

**NOTE:** The machine will can not operate when charging.

## PREVENTATIVE MAINTENANCE

**! WARNING:** Before performing any maintenance on the machine, be sure that the power is turned off, or the batteries are disconnected!

**! WARNING:** Repairs are to be completed by Authorized service centers only. Any repairs completed by unauthorized persons will void the warranty.

### DAILY MAINTENANCE

1. Remove pad driver/ brush and clean with approved cleaner.
2. Drain recovery and solution tanks completely and rinse out with clean water. Visually check the recovery tank for debris and clean out as necessary.
3. Raise the squeegee assembly off floor and wipe it down with a damp towel. Be sure to store the squeegee in the up position.

4. Remove the vacuum fan inlet filter and rinse it out with clean water.
5. Clean machine with an approved cleaner and a damp towel.
6. Recharge the batteries.
7. Check the condition of the squeegee blade wiping edge, rotate blade if worn.

## **MONTHLY MAINTENANCE**

1. Clean the battery tops to prevent corrosion.
2. Check for loose battery cable connections.
3. Inspect and clean the recovery tank cover seal. Replace it if damaged.
4. Lubricate all grease points and pivot points with silicon spray and approved grease.
5. Check the machine for loose nuts and bolts.
6. Check the machine for leaks.

## **MOTOR MAINTENANCE**

1. Contact your local Distributor for any motor maintenance.
2. Motor should have the brushes checked every 250 hours. Brushes should be replaced when they are worn to a length of 10 mm or less.

## **BATTERY MAINTENANCE**

**WARNING: Batteries emit hydrogen gas and an explosion or fire can result. Keep sparks and fire away from batteries at all times.**

**WARNING: Whenever servicing batteries, be sure to wear protective gloves. Avoid contact with battery acid at all times.**

***NOTE: For the best machine performance, keep batteries charged at all times. Do not let them sit in a discharged condition.***

1. Always follow the battery charging directions as outlined in the BATTERY CHARGING section of this manual.
2. Keep battery tops and terminals free from corrosion. A strong solution of baking soda and water is the best way to keep the batteries corrosion free. DO NOT ALLOW THE BAKING SODA / WATER SOLUTION TO ENTER THE BATTERY CELLS.
3. Use a wire brush with the baking soda solution to properly clean the battery posts and connections.
4. Check battery connections for wear and loose terminals. replace if necessary.

## **MACHINE STORAGE**

1. Always store the machine indoors.
2. Always store the machine in a dry area.
3. Always store the machine in its upright position.
4. Always store the machine with the pad driver/brush raised off the floor.
5. Always store the machine with the squeegee assembly raised off the floor.
6. If storing in an area which may reach freezing temperatures, be sure to drain all fluids from the machine prior to storage. Any damage caused by freezing temperatures will not be covered by the warranty.
7. Drain the recovery tank.
8. Drain the solution tank of all fluid.

## **FAULT CODE & SOLUTION**

The machine is equipped with a LED display screen (see Machine components, item # 31), the LED screen will display the operating hours (see Machine components, item # 35) and the battery level status (see Machine components, item # 30).

When the machine detects a fault, there will be a Fault code (see Machine components, item #33) & Fault message (see Machine components, item #34) display on the LED screen, and the Fault indicator (see Machine components, item #32) will flash continuously, accompany an audible alarm Occasionally.

Once fault occurring, please DO NOT continue operate the machine unless the fault are eliminated. Turn off the machine, then to solve the fault, the fault code & message will be eliminated when machine restart.

If the fault is occurred frequently, or the fault can't be eliminated, please contact ICE service center.

Please refer to the below table to determine the fault cause and the solution.

## FAULT CODE & SOLUTION

FAULT CODE	FAULT MESSAGE	FAULT CAUSE	SOLUTION
F01	Seat Empty	Not sit in the seat	Sit in the operator seat
F02	Squeegee Actt O.L. RE-START!	Squeegee lifting actuator is overload	Turn off the machine,after a moment, RE-START machine.
F03	Bru Actt O.L. RESTART!	Scrub head lifting actuator is overload	
F04	Vac Mtr O.L. RE-START!	Vacuum motor overload	
F05	Left Bru Mtr O.L. RE-START!	Left brush motor is overload	
F06	Right Bru Mtr O.L. RE-START!	Right brush motor is overload	
F07	Propel Mtr O.L. RE-START!	Propel motor overload	
F08	RecTank Full	Recovery tank is full	Drain the Recovery tank
F09	Soln Tank empty	Solution tank is empty	Fill the solution tank
F10	Batt Low Charge Batt	Battery is low	Charge the battery
F11	Batt Empty Charge Batt NOW	Battery is empty	Charge the battery NOW
F12	Brake Wiring Error	Bad Brake wiring	Check the brake wiring
F13	Release Foot pedal	Stepping the propel pedal when starting machine	Release the propel pedal
F14	Replace Brake Assy	Bad Brake assembly	Replace the brake assembly
F16	Control Unit Overheat! Wait	Control Unit Overheat	Turn off the machine,after a moment, RE-START machine
F17	Replace Control Unit	Control Unit Fault	Replace the control unit
F18	Replace Accel Pedal Sensor	Bad Accelerator pedal sensor	Replace accelerator pedal sensor
F19	Replace Brake pedal sensor	Bad Accelerator pedal sensor	Replace accelerator pedal sensor
F20	Check Left Brush motor	Bad left brush motor	Check left brush motor/ wiring
F21	Check Vac Mtr	Bad Vacuum motor or wiring	Check the vacuum motor / Wiring
F22	Check Soln Solenoid	Solution solenoid wiring fault	Check the wiring & Contactors
F23	Replace Soln solenoid	Bad Solution solenoid	Replace the solution solenoid
F24	Check Propel Motor	Bad propel motor	Check the propel motor / Wiring
F25	Check Right Brush motor	Bad right brush motor	Check right brush motor/ wiring
F40	Check Proximity Sw	Proximity switch fault	Check the Proximity switch
F42	Replace Control Unit	Bad Control Unit	Replace the control unit
F43	Turn Dead Sw Off RE-START!	Emergency stop button activated	Release emergency stop button and restart machine
F44	Replace Control Unit	Bad Control Unit	Contact service center, Replace the Control Unit
F45	Return Control Unit		
F46	Return Control Unit		
F47	Return Control Unit		
F48	Return Control Unit		

**TECHNICAL SPECIFICATIONS**

MODEL	RS26 DUAL DISK	RS32 DUAL DISK	RS28-OB ORBITAL
LENGTH	61.6 in / 1,565 mm		
WIDTH (MACHINE WITH SCRUB HEAD)	32 in / 815 mm	37.4 in / 950 mm	31.5 in / 800 mm
HEIGHT	56.7 in / 1,440 mm		
WEIGHT	618 lbs / 280 Kg	640 lbs / 290 Kg	
WEIGHT WITH BATTERIES	880 lbs / 400 Kg	900 lbs / 410 Kg	
RECOVERY TANK CAPACITY	29 Gal / 110 L		
SOLUTION TANK CAPACITY	29 Gal / 110 L

BAT: 4-6VDC batteries

FU: 150A fuse

CW: Off-board charger interlock switch

BR1: Main controller circuit breaker, 5A

KEY SW: Main power key switch

AS: Alarm lamp switch

LED2: Alarm lamp

CH1: On-board battery charger

CH2: Off-board battery charger port

LED1: Work LED light

BR2: Brake circuit breaker, 10A

M3: Traction motor

M1: Brush motor, left / Orbital head motor

M6: Brush motor, right

M2: Vacuum motor

AP: Accelerator Pedal, sensor

SL: Solution tank water level sensor

RF: Recovery tank water level sensor

RT: Reverse switch

ST: Seat switch

EG: Emergency stop switch

M4: Scrub head lifting actuator

M5: Squeegee lifting actuator

BK: Brake coil

DP: Detergent pump

EW: Solution solenoid valve

HN: Horn
